

Number Ninja's Maths Club

In Maths club look we have been looking at the place value of a 2-digit number. We have used resources to help us show how many tens and ones are in a number.

To help us become fluent with our number bonds to 10. We created our own number bond activity sheet. We drew round our hands and cut them out and used this to help us work out all the number bonds to 10. We worked systematically! ☺
